TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

INDEX, VOLUMES 21–30
1920–1928

	Vol.	Pages
Adams, C. R., The general theory of a class of linear partial q-difference equations	26_3	283–312
—— Existence theorems for a linear partial difference equation of the intermediate type	28_1	119–128
—— On the irregular cases of the linear ordinary difference equation	30_3 30_4	507–541 855
Alexander, J. W., On the equilibrium of a fluid mass at rest	21_4	446–450
—— On transformations with invariant points	23_1	89– 95
—— A proof and extension of the Jordan-Brouwer separation theorem	23_4	333–349
—— Invariant points of a surface transformation of given class	25_2	173–184
—— Combinatorial analysis situs	28_2	301–329
—— Topological invariants of knots and links	30_2	275–306
Archibald, R. G., Diophantine equations in division algebras	30_4	819–837
Ayres, W. L., Concerning the arc-curves and basic sets of a continuous curve	30_3	567–578
Bateman, H., An extension of Lagrange's expansion	28_2	346–356
Bell, E. T., Arithmetical paraphrases	22_1	1– 30
—— Arithmetical paraphrases (II)	22_2	198–219
—— On restricted systems of higher indeterminate equations	22_4	483–488
—— Anharmonic polynomial generalizations of the numbers of Bernoulli and Euler	24_2	89–112
—— Euler algebra	25_1	135–154
—— Applications of analysis to the arithmetic of higher forms	25_2	185–189
—— A new type of class number relations	26_4	446–450
—— An algebra of sequences of functions, with an application to the Bernoullian functions	28_1	129–148
—— Arithmetic of logic	29_3	597–611
Bender, H. A., Determination of all the prime power groups containing only one invariant subgroup of every index which exceeds this prime number	26_4	427–434
Bernstein, B. A., Operations with respect to which the elements of a Boolean algebra form a group	26_2 27_4	171–175 600
—— Sets of postulates for the logic of propositions	28_3	472–478
—— On the existence of fields in Boolean algebras	28_4	654–657

	Vol.	Pages
Birkhoff, G. D. (with O. D. Kellogg), Invariant points in function space	23_1	96–115
Bliss, G. A., Differential equations containing arbitrary functions	21_2	79– 92
—— Functions of lines in ballistics	21_2	93–106
—— Birational transformations simplifying singularities of algebraic curves	24_4	274–285
—— A boundary value problem for a system of ordinary linear differential equations of the first order	28_4	561–584
Blumberg, H., New properties of all real functions	24_2	113–128
Brown, B. H., The equilong transformations of euclidean space.	25_4	469–484
Brown, E. P. (with R. E. Langer), On a class of integral equations with discontinuous kernels	29_4	683–715
Buchanan, D., Asymptotic planetoids	23_4	409–431
Camp, C. C., Expansions in terms of solutions of partial differential equations. First paper: Multiple Fourier series expansions	25_1	123–134
—— Expansions in terms of solutions of partial differential equations. Second paper: Multiple Birkhoff series	25_3	338–342
Carlson, E., Extension of Bernstein's theorem to Sturm-Liouville sums	26_2	230–240
—— On the convergence of certain methods of closest approximation	28_3	435–447
Carman, M. G., Expansion problems in connection with homogeneous linear q-difference equations	28_3	523–535
Carpenter, A. F., Cone cubic configurations of a ruled surface.	27_4	397–415
—— Triads of ruled surfaces	29_2	254–275
Castellani, M., Algebraic surfaces with reducible bitangent and osculating hyperplanar sections	27_3	279–286
Chittenden, E. W., Relatively uniform convergence and the classification of functions	23_1	1– 15
Chohkate, J. See Shohat, J. A.		
Church, A., On irredundant sets of postulates	27_3	318–328
—— Alternatives to Zermelo's assumption	29_1	178–208
Coble, A. B., Associated sets of points	24_1	1– 20
—— Double binary forms with the closure property	28_3	357–383
Coolidge, J. L., The geometry of hermitian forms	21_1	44– 51
—— Differential geometry of the complex plane	23_2	117–134
—— The Gaussian law of error for any number of variables	24_2	135–143
Copeland, A. H., Types of motion of the gyroscope	30_4	737–764
Curtis, M. F., Curves invariant under point-transformations of special type	23_2	151–172

	Vol.	Pages
Curtiss, D. R., A note on the preceding paper (by J. L. Walsh),	24_3	181–184
Davis, D. R., The inverse problem of the calculus of variations in higher space	30_4	710–736
Davis, H. T., An existence theorem for the characteristic numbers of a certain boundary value problem	26_1	1– 16
Dickson, L. E., Determination of all general homogeneous polynomials expressible as determinants with linear elements	22_2	167–179
—— New division algebras	28_2	207–234
—— Singular case of pairs of bilinear, quadratic, or hermitian forms	29_2	239–253
—— Simpler proofs of Waring's theorem on cubes, with various generalizations	30_1	1– 18
Dines, L. L., A theorem on the factorization of polynomials of a certain type	26_1	17– 24
—— On sets of functions of a general variable	29_2	463–470
—— A theorem on orthogonal functions with an application to integral inequalities	30_2	425–438
—— A theorem on orthogonal sequences	30_2	439–446
Dodd, E. L., The greatest and least variate under general laws of error	25_4	525–539
Douglas, J., On certain two-point properties of general families of curves	22_3	289–310
—— Normal congruences and quadruply infinite systems of curves in space	26_1	68–100
—— A criterion for the conformal equivalence of a Riemann space to a euclidean space	27_3	299–306
—— Extremals and transversality of the general calculus of variations problem of the first order in space	29_2	401–420
Dresden, A., On the second derivatives of an extremal-integral with an application to a problem with variable end points (supplementary paper)	25_2	190–192
Edington, W. E., Abstract group definitions and applications	25_2	193–210
Eiesland, J., The group of motions of an Einstein space	27_2	213–245
Eisenhart, L. P., Orthogonal systems of hypersurfaces in a general Riemann space	25_2	259–280
—— Symmetric tensors of the second order whose first covariant derivatives are zero	25_2	297–306
—— Space-time continua of perfect fluids in general relativity	26_2	205–220
—— Geometries of paths for which the equations of the paths admit a quadratic first integral	26_3	378–384
—— Fields of parallel vectors in a riemannian geometry	27_4	563–573

	Vol.	Pages
Eisenhart, L. P., Geometries of paths for which the equations of the paths admit $n(n+1)/2$ independent linear first integrals	28_2	330–338
Emch, A., On the Weddle surface and analogous loci	27_3	270–278
—— On the discriminant of ternary forms and a certain class of surfaces	28_3	432–434
Ettlinger, H. J., Oscillation theorems for the real, self-adjoint linear system of the second order	22_2	136–143
Everett, H. S., Determination of all general homogeneous polynomials expressible as determinants whose elements are homogeneous polynomials	24_3	185–194
Eversull, B. M., The summability of the triple Fourier series at points of discontinuity of the function developed	26_3	313–334
Feldstein, M. M., Invariants of the linear group modulo p^k	25_2	223–238
Fite, W. B., Properties of the solutions of certain functional differential equations	22_3	311–319
Ford, L. R., On the closeness of approach of complex rational fractions to a complex irrational number	27_2	146–154
Fort, T., Note on Dirichlet and factorial series	23_1	26– 29
Franklin, P., Invariant sets of equations in Riemann space	25_4	485–500
—— Analytic transformations of everywhere dense point sets	27_1	91–100
—— Osculating curves and surfaces	28_3	400–416
—— (with N. Wiener), Analytic approximations to topological transformations	28_4	762–785
Garabedian, C. A., Circular plates of constant or variable thickness	25_3	343–398
Gehman, H. M., On extending a continuous (1–1) correspondence of two plane continuous curves to a correspondence of their planes	28_2	252–265
—— Concerning acyclic continuous curves	29_3	553–568
—— Concerning end points of continuous curves and other continua	30_1	63– 84
Glenn, O. E., A memoir upon formal invariancy with regard to binary modular transformations. Invariants of relativity	21_3 22_4	285–312 543
Gouwens, C., Invariants of the linear group modulo $\pi = p_1^{\lambda_1} p_2^{\lambda_2} \cdots p_n^{\lambda_n}$	26_4	435–440
Graustein, W. C., Parallel maps of surfaces	23_3	298–332
—— Representations of a complex point by pairs of ordered real points	24_4	245–254
—— Isometric W-surfaces	26_2	176–204
—— (with B. O. Koopman), A necessary and sufficient condition that two surfaces be applicable	26_3	369–372

	Vol.	Pages
Graves, L. M. (with T. H. Hildebrandt), Implicit functions and their differentials in general analysis	29_1	127–153
—— Riemann integration and Taylor's theorem in general analysis	29_1	163–177
—— Implicit functions and differential equations in general analysis	29_3	514–552
Green, G. M., Nets of space curves	21_2	207–236
Gronwall, T. H., Differential variations in ballistics, with applications to the qualitative properties of the trajectory	22_4	505–525
—— The mutual inductance of two square coils	27_4	516–536
—— On the zeros of the function $\beta(z)$ associated with the gamma function	28_3 28_4	391–399 786
Grove, V. G., A theory of a general net on a surface	28_3	491–501
—— A general theory of nets on a surface	29_4	801–814
—— Transformations of nets	30_3	483–497
Gummer, C. F., The relative distribution of the real roots of a system of polynomials	23_3	265–282
Hardy, G. H., On the representation of a number as the sum of any number of squares, and in particular of five	21_3 29_4	255–284 845–847
Hart, W. L., Functions of infinitely many variables in Hilbert space	23_1	30– 50
Hazlett, O. C., A theorem on modular covariants	21_2	247–254
—— New proofs of certain finiteness theorems in the theory of modular covariants	22_2	144–157
—— A symbolic theory of formal modular covariants	24_4 30_4	286–311 855
Hedrick, E. R. (with L. Ingold), Analytic functions in three dimensions	27_4	551–555
—— (with L. Ingold), The Beltrami equations in three dimensions	27_4	556–562
Hildebrandt, T. H. (with L. M. Graves), Implicit functions and their differentials in general analysis	29_1	127–153
Hille, E., Oscillation theorems in the complex domain	23_4	350–385
—— An existence theorem	26_2	241–248
Hoskins, L. M., The strain of a gravitating sphere of variable density and elasticity	21_1	1– 43
Hotelling, H., Three-dimensional manifolds of states of motion	27_3	329–344
—— Multiple-sheeted spaces and manifolds of states of motion	28_3	479–490
Huber, C. M., On the prime divisors of the cyclotomic functions	27_1	43– 48

	Vol.	Pages
Huntington, E. V., A new set of postulates for betweenness, with proof of complete independence	26_2	257–282
—— Sets of independent postulates for the arithmetic mean, the geometric mean, the harmonic mean, and the root-mean-square	29_1	1– 22
—— The apportionment of representatives in Congress	30_1	85–110
Hurwitz, W. A., An expansion theorem for a system of linear differential equations of the first order	22_4	526–543
—— On Bell's arithmetic of Boolean algebra	30_2	420–424
Hutchinson, J. I., On a remarkable class of entire functions	25_3	325–332
—— On the roots of the Riemann zeta function	27_1	49– 60
Ingold, L. (with E. R. Hedrick), Analytic functions in three dimensions	27_4	551–555
—— (with E. R. Hedrick), The Beltrami equations in three dimensions	27_4	556–562
—— A symbolic treatment of the geometry of hyperspace	27_4	574–599
Ingraham, M. H., A general theory of linear sets	27_2	163–196
—— Solution of certain functional equations relative to a general linear set	28_2 28_4	287–300 786
Jackson, D., On the order of magnitude of the coefficients in trigonometric interpolation	21_3	321–332
—— On functions of closest approximation	22_1	117–128
—— On the convergence of certain trigonometric and polynomial approximations	22_2	158–166
—— Note on a class of polynomials of approximation	22_3	320–326
—— Note on an ambiguous case of approximation	25_3	333–337
—— On approximation by functions of given continuity	25_3	449–458
—— A generalized problem in weighted approximation	26_1	133–154
—— Some non-linear problems in approximation	30_4	621–629
Jensen, C. M., Some problems in the theory of interpolation by Sturm-Liouville functions	29_1	54– 79
Kakeya, S., Maximum modulus of some expressions of limited analytic functions	22_4	489–504
Kasner, E., An algebraic solution of the Einstein equations	27_1	101–105
—— Solutions of the Einstein equations involving functions of only one variable	27_2	155–162
—— Transversality in space of three dimensions	30_3	447–452
—— The second derivative of a polygenic function	30_4	803–818
Kellogg, O. D. (with G. D. Birkhoff), Invariant points in function space	23_1	96–115
—— Some properties of spherical curves, with applications to the gyroscope	25_4	501–524

	Vol.	Pages
Kempner, A. J., Polynomials and their residue systems	22_2	240–266
—— Polynomials and their residue systems (continued)	22_3	267–288
—— Polynomials of several variables and their residue systems	27_3	287–298
Ketchum, P. W., Analytic functions of hypercomplex variables	30_4	641–667
Kline, J. R., Concerning approachability of simple closed and open curves	21_4	451–458
Koopman, B. O. (with W. C. Graustein), A necessary and sufficient condition that two surfaces be applicable	26_3	369–372
—— On rejection to infinity and exterior motion in the restricted problem of three bodies	29_2	287–331
Lane, E. P., A general theory of conjugate nets	23_3	283–297
—— Ruled surfaces with generators in one-to-one correspondence	25_2	281–296
—— Bundles and pencils of nets on a surface	28_1	149–167
—— The contact of a cubic surface with an analytic surface	29_3	471–480
—— The projective differential geometry of systems of linear homogeneous differential equations of the first order	30_4	785–796
Langer, R. E., Developments associated with a boundary problem not linear in the parameter	25_2	155–172
—— On the momental constants of a summable function	28_1	168–182
—— On the theory of integral equations with discontinuous kernels	28_4	585–639
—— (with E. P. Brown), On a class of integral equations with discontinuous kernels	29_4	683–715
—— (with J. D. Tamarkin), On integral equations with discontinuous kernels	30_3	453–471
Langford, C. H., On a type of completeness characterizing the general laws for separation of point-pairs	29_1	96–110
Larew, G. A., The Hilbert integral and Mayer fields for the problem of Mayer in the calculus of variations	26_1	61– 67
Lefschetz, S., On certain numerical invariants of algebraic varieties with application to abelian varieties	22_3	327–406
—— On certain numerical invariants of algebraic varieties with application to abelian varieties (continued)	22_4	407–482
—— Intersections and transformations of complexes and manifolds	28_1	1– 49
—— Manifolds with a boundary and their transformations	29_2 29_4	429–462 848
LeStourgeon, E., Minima of functions of lines	21_4	357–383
Levy, H., Tensors determined by a hypersurface in Riemann space	28_4	671–694

	Vol.	Pages
Libman, E. E., The linear complex of conics	27_3	265–269
Linfield, B. Z., On certain polar curves with their application to the location of the roots of the derivatives of a rational function	25_2	239–258
Logsdon, M. I., Complete groups of points on a plane cubic curve of genus one	27_4	474–490
Lubben, R. G., Concerning limiting sets in abstract spaces	30_4	668–685
McDonald, J. H., On a class of polynomials in the theory of Bessel's functions	28_3	384–390
—— The differential equation of the elliptic cylinder	29_4	647–682
MacDuffee, C. C., Invariantive characterizations of linear algebras with the associative law not assumed	23_2	135–150
—— On covariants of linear algebras	26_1	124–132
Manning, W. A., Simply transitive primitive groups	29_4	815–825
March, H. W., The deflection of a rectangular plate fixed at the edges	27_3	307–317
Maria, A. J., Functions of plurisegments	28_3	448–471
Mathews, R. M., Cubic curves and desmic surfaces	28_3	502–522
—— Cubic curves and desmic surfaces, second paper	30_1	19– 23
Mears, F. M., Riesz summability for double series	30_4	686–709
Michal, A. D., Functionals of r-dimensional manifolds admitting continuous groups of point transformations	29_3	612–646
Miller, G. A., Properties of the subgroups of an abelian prime power group which are conjugate under its group of isomorphisms	21_3	313–320
—— I-conjugate operators of an abelian group	24_1	70– 78
—— The subgroup composed of the substitutions which omit a letter of a transitive group	27_2	137–145
—— Multiply transitive substitution groups	28_2	339–345
—— Possible orders of two generators of the alternating and of the symmetric group	30_1	24– 32
Milne, W. E., The behavior of a boundary value problem as the interval becomes infinite	30_4	797–802
Moore, C. N., On the summability of the developments in Bessel's functions	21_2	107–156
—— Generalized limits in general analysis, first paper	24_2	79– 88
—— Generalized limits in general analysis, second paper	25_4	459–468
—— On convergence factors in multiple series	29_1	227–238
Moore, R. L., Concerning simple continuous curves	21_3	333–347
—— Concerning certain equicontinuous systems of curves	22_1	41– 55
—— Concerning upper semi-continuous collections of continua	27_4	416–428

	Vol.	Pages
Morse, H. M., Recurrent geodesics on a surface of negative curvature	22_1	84–100
—— A fundamental class of geodesics on any closed surface of genus greater than one	26_1	25– 60
—— Relations between the critical points of a real function of n independent variables	27_3	345–396
—— The foundations of a theory in the calculus of variations in the large	30_2	213–274
Mullikin, A. M., Certain theorems relating to plane connected point sets	24_2	144–162
Murray, F. H., A type of differential system containing a parameter	25_3	315–324
—— On certain families of orbits with arbitrary masses in the problem of three bodies	28_1 29_4	74–108 848
—— On certain families of orbits with arbitrary masses in the problem of three bodies, second paper	28_1	109–118
Nelson, A. L., Pseudo-canonical forms and invariants of systems of partial differential equations	22_2	180–197
Niemytzki, V. W., On the "third axiom of metric space"	29_3	507–513
Nörlund, N. E., Sur certaines équations aux différences finies	25_1	13– 98

Roos, C. F., Generalized Lagrange problems in the calculus of variations	30_2	360–384
Roth, W. E., A solution of the matric equation $P(X)=A$	30_3	579–596
Rutledge, G., Maclaurin expansion of the interpolation polynomial determined by $2n+1$ evenly spaced points	26_1	113–123
Schmidt, K., The theory of functions of one Boolean variable	23_2	212–222
Schouten, J. A., On the conditions of integrability of covariant differential equations	27_4	441–473
Sharpe, F. R. (with V. Snyder), Certain types of involutorial space transformations	21_1	52– 78
—— (with V. Snyder), The construction of algebraic correspondences between two algebraic curves	22_1	31– 40
—— (with V. Snyder), The (1, 2) correspondence associated with the cubic space involution of order two	25_1	1– 12
Shaw, J. B., On triply orthogonal congruences	21_4	391–408
—— General vector calculus	24_3	195–244
Sheffer, I. M., Systems of equations in an infinity of unknowns, whose solution involves an arbitrary parameter	28_2	266–286

	Vol.	Pages
Shohat, J. A. (Chokhate, J.), On the development of continuous functions in series of Tchebycheff polynomials	27_4	537–550
—— On a general formula in the theory of Tchebycheff polynomials and its applications	29_3	569–583
Silverman, L. L., The equivalence of certain regular transformations	26_1	101–112
Simmons, H. A., The first and second variations of a double integral for the case of variable limits	28_2	235–251
Simonds, E. F., Invariants of infinite groups in the plane	21_4	384–390
Slotnick, M. M., A contribution to the theory of fundamental transformations of surfaces	30_1	190–212
Smith, H. L., On the existence of the Stieltjes integral	27_4	491–515
—— On relative content and Green's lemma	30_2	405–419
Snyder, V. (with F. R. Sharpe), Certain types of involutorial space transformations	21_1	52– 78
—— (with F. R. Sharpe), The construction of algebraic correspondences between two algebraic curves	22_1	31– 40
—— (with F. R. Sharpe), The (1, 2) correspondence associated with the cubic involution of order two	25_1	1– 12
Speiser, A., Die Zerlegung von Primzahlen in algebraischen Zahlkörpern	23_2	173–178
Starke, E. P., Certain uniform functions of rational functions	29_2	276–286
Stone, M. H., An unusual type of expansion problem	26_3	335–355
—— A comparison of the series of Fourier and Birkhoff	28_4	695–761
—— Irregular differential systems of order two and the related expansion problems	29_1	23– 53
—— The expansion problems associated with regular differential systems of the second order	29_4	826–844
Stouffer, E. B., On the independence of principal minors of determinants	26_3	356–368
—— Singular ruled surfaces in space of five dimensions	29_1	80– 95
Sturdivant, J. H., Second-order linear systems with summable coefficients	30_3	560–566
Synge, J. L., A generalization of the riemannian line-element	27_1	61– 67
Tamarkin, J. D., On Laplace's integral equations	28_3	417–425
—— On Volterra's integro-functional equation	28_3	426–431
—— The notion of the Green's function in the theory of integro-differential equations	29_4	755–800
—— (with R. E. Langer), On integral equations with discontinuous kernels	30_3	453–471
Taylor, J. H., A generalization of Levi-Civita's parallelism and the Frenet formulas	27_2	246–264

	Vol.	Pages
Thomas, J. M., Asymmetric displacement of a vector	28_4	658–670
Thomas, T. Y. (with O. Veblen), The geometry of paths	25_4	551–608
—— (with O. Veblen), Extensions of relative tensors	26_3	373–377
Turner, J. S., A fundamental system of invariants of a modular group of transformations	24_2	129–134
Uspensky, J. V., On Jacobi's arithmetical theorems concerning the simultaneous representation of numbers by two different quadratic forms	30_2	385–404
—— On the convergence of quadrature formulas related to an infinite interval	30_3	542–559
Van de Walle, W. E., On the complete independence of the postulates for betweenness	26_2	249–256
Vandiver, H. S., Application of the theory of relative cyclic fields to both cases of Fermat's last theorem	28_3	554–560
—— Application of the theory of relative cyclic fields to both cases of Fermat's last theorem, second paper	29_1	154–162
Van Vleck, E. B., Non-loxodromic substitutions and groups in n dimensions	24_4	255–273
Veblen, O., The intersection numbers	25_4	540–550
—— (with T. Y. Thomas), The geometry of paths	25_4	551–608
—— (with T. Y. Thomas), Extensions of relative tensors	26_3	373–377
Vinogradov, J. M., On a general theorem concerning the distribution of the residues and non-residues of powers	29_1	209–217
—— On the bound of the least non-residue of nth powers	29_1	218–226
Walsh, J. L., On the location of the roots of the jacobian of two binary forms, and of the derivative of a rational function	22_1	101–116
—— A generalization of the Fourier cosine series	22_2	230–239
—— Some two-dimensional loci connected with cross ratios	23_1	67– 88
—— On the location of the roots of the jacobian of two binary forms, and of the derivative of a rational function	24_1	31– 69
—— On the location of the roots of certain types of polynomials	24_3	163–180
—— On the expansion of analytic functions in series of polynomials	26_2	155–170
—— On the expansion of analytic functions in series of polynomials and in series of other analytic functions	30_2	307–332
—— On approximation to an arbitrary function of a complex variable by polynomials	30_3	472–482
—— On the degree of approximation to an analytic function by means of rational functions	30_4	838–847
Ward, L. E., Some third-order irregular boundary value problems	29_4	716–745

	Vol.	Pages
Wedderburn, J. H. M., On division algebras	22_2	129–135
—— Algebras which do not possess a finite basis	26_4	395–426
Weiss, M. J., Primitive groups which contain substitutions of prime order p and of degree $6p$ or $7p$	30_2	333–359
White, H. S., A property of two $(n+1)$-gons inscribed in a norm-curve in n-space	22_1	80– 83
Whyburn, G. T., Concerning continua in the plane	29_2	369–400
—— Concerning point sets which can be made connected by the addition of a simple continuous arc	29_4	746–754
—— Concerning the cut points of continua	30_3	597–609
Whyburn, W. M., Second-order differential systems with integral and k-point boundary conditions	30_4	630–640
—— Existence and oscillation theorems for non-linear differential systems of the second order	30_4	848–854
Widder, D. V., A general mean-value theorem	26_3	385–394
—— A generalization of Taylor's series	30_1	126–154
Wiener, N., A set of postulates for fields	21_2	237–246
—— Discontinuous boundary conditions and the Dirichlet problem	25_3 26_4	307–314 494
—— (with P. Franklin), Analytic approximations to topological transformations	28_4	762–785
Wilczynski, E. J., One parameter families and nets of ruled surfaces and a new theory of congruences	21_2	157–206
—— A set of properties characteristic of a class of congruences connected with the theory of functions	21_4	409–445
—— Some generalizations of geodesics	23_3	223–239
Wilder, C. E., Differential geometry of an m-dimensional manifold in a euclidean space of n dimensions	25_1	99–122
—— Reduction of the ordinary linear differential equation of the nth order whose coefficients are certain polynomials in a parameter to a system of n first-order equations which are linear in the parameter	29_3	497–506
Wilder, R. L., A connected and regular point set which has no subcontinuum	29_2	332–340
Williams, K. P., A uniqueness theorem for the Legendre and Hermite polynomials	26_4	441–445
—— Non-synchronized relative invariant integrals	28_1	198–206
Williams, W. L. G., Fundamental systems of formal modular seminvariants of the binary cubic	22_1	56– 79
—— Fundamental systems of formal modular protomorphs of binary forms	28_1	183–197

	Vol.	Pages
Williamson, J., Conditions for associativity of division algebras connected with non-abelian groups	30_1	111–125
Wilson, N. R., Integers and basis of a number field	29_1	111–126
Wilson, W. A., On the oscillation of a continuum at a point	27_4	429–440
—— Some properties of limited continua, irreducible between two points	28_3	536–553
Wood, F. E., On certain relations between the projective theory of surfaces and the projective theory of congruences	23_4	386–408
Woods, R., The elliptic modular functions associated with the elliptic norm curve E^7	23_2	179–197
